EXIDE TECHNOLOGIES

Exide Technologies is a global leader in providing electrical energy storage solutions, serving the industrial and transportation markets. Exide Technologies operates in more than 80 countries, and features the world's largest company-owned sales and distribution network.

The Company uses a comprehensive business approach to recycling called Total Battery Management (TBM)™. TBM includes manufacturing and distribution of lead-acid batteries, collection of spent batteries, reclamation of battery materials, and use of those materials in new batteries.

Exide Technologies recycles sufficient lead tonnage to make the Company one of the largest secondary lead recyclers in the world, returning the materials to new product and diverting them from the waste stream. Exide Technologies' batteries are recyclable.

Marine / RV

Warranty is reduced by 50% for Exide Marine/RV batteries if used in a commercial application.

NOTES:

- (1) Check cable-to-terminal connection design and battery dimensions for proper fitment.
- (2) Dry charge battery - requires ACID 32 OZ Acid Bottle for activation.
- (3) SEALED VRLA (AGM) - battery and acid included in carton.
- (4) FP - Fresh Pack - Battery and acid included in carton.
- (5) Check fit for potential height adaptor use.

- (6) SEALED - VRLA - AGM Battery, factory filled, charged and activated.
- (8) UNIV. contains all the wire lead connectors to fit all 6-Volt batteries of that capacity level.
- (*) Hold-down modification may be required.

1 20 AMP HOUR CAPACITY AT 80°F

Terminal designs and designations supplied for reference only. See your Exide Battery Catalog for dimensional details.

EXIDE® LIMITED WARRANTY

Exide Technologies takes great pride in the batteries it manufactures and provides a limited warranty program for many of its batteries. There are 2 components of the limited warranty program for batteries covered by Exide's limited warranty: **FREE REPLACEMENT** and **PRO RATA**.

Note: Exide discontinued pro rata warranty on batteries ordered from Exide on or after 10/1/2012.

The label on the front of every Exide-labeled battery covered by Exide's limited warranty specifies the total number of months covered by the free replacement period.* To determine the pro rata warranty period for your Exide battery please see the pro rata schedule in the warranty section of StartPositiveStayPositive.com. If your Exide battery part number is not on the pro rata limited warranty schedule in the warranty section of StartPositiveStayPositive.com, then your battery is eligible only for the free replacement period and not for the pro rata limited warranty.

The pro rata period applies after the free replacement period expires, until the end of the total limited warranty. So for a battery with 84 total months in the limited warranty, and a 30 month free replacement period, the free replacement limited warranty applies in months 1 through 30 and the pro rata limited warranty applies in months 31 through 84.

NOTE: This limited warranty limits Exide's responsibility to providing a replacement battery or a pro rata purchase price in the event of defects in materials or workmanship, under the below terms. Warranty law varies from state to state, however, and so you may also have additional legal rights depending on your state's laws.

If your battery fails to start your vehicle / equipment, we recommend the following course of action:

- 1- Determine if the battery needs a boost or replacement. Most batteries that fail are simply discharged and need a boost.** Exide recommends having the battery tested first to determine the cause of failure. If the battery is simply in need of a boost, have it re-charged and re-tested.
- 2- If the battery is still not working properly, you can determine if the battery is under the free replacement period by referring to the free replacement period on the front label, and checking the date on your original receipt.*** If the battery is under the free replacement period, it can be replaced with a new replacement Exide battery of the exact same type at no charge to you (other than any applicable installation charges).
- 3- If the battery is outside the free replacement period, you will need to determine whether the battery is eligible for the pro rata program. To determine how long the battery has been in service, and whether it is eligible for the pro rata program look at your original battery receipt or if the receipt is not available, look at the battery dater punch-out on the label.

* If the label does not reference a warranty period, this limited warranty program does not apply, and Exide does not provide any warranties except as otherwise required by applicable law. Warranties may be offered by the seller at your place of purchase, but Exide is not responsible for any such warranties.

** THIS WARRANTY DOES NOT COVER merely discharged product, damage to the battery caused by abuse or neglect, or damage to batteries which are opened, tampered with, or otherwise altered in any manner including, but not limited to, the introduction of any special additives or electrolyte into the battery. In addition, warranty is reduced by 50% for the Exide Auto/Truck/SUV and Marine/RV batteries if used in a commercial application and for Exide Heavy Duty batteries if used in APUs (Auxiliary Power Units).

*** Proof of purchase is required (original receipt) for the free replacement warranty. This policy is available from an Exide Distributor, by calling 1-800-START IT or by visiting StartPositiveStayPositive.com under the warranty section. Nontransferable limited warranty.

EXIDE® FREE REPLACEMENT WARRANTY

If a battery is returned within the free replacement period (calculated from the date of sale to the consumer or end user) for failure to perform due to defects in materials or workmanship, the consumer or end user should be provided a new replacement Exide Battery of the same type at no charge. Make sure to punch out the dater with the original purchase date (not the current date).

Original Battery Sold in August 2008.
Replaced in December 2008 but punch out at the original date, August 2008.
